

December 2024 Quarterly Report

Highlights

- **Binding Share Purchase Option Agreement executed for the divestment of LCL's Colombian projects; notably the Quinchia Gold Project. Upon completion the Company will receive shares and cash to the value of A\$10 million¹.**
- **Six trenches were completed at the Dada project in PNG, confirming a copper-gold porphyry discovery.**
- **All trenches intersected gold mineralisation with a highlight of 25m at 0.34g/t au and 0.27% Cu².**

LCL Resources (ASX: LCL) ("LCL" or the "Company") is pleased to provide an overview of activities completed during the December 2024 Quarter.

Binding Terms for the Sale of Colombian Assets

During the Quarter the Company executed a Binding Share Purchase Option Agreement with Tiger Gold Corporation ("TGC") for the divestment of its Colombian projects, being the Quinchia Gold Project and the Andes Gold Project ("the Agreement"). A General Meeting of shareholders will occur on the 17 February 2025 to approve the Agreement.

The Agreement includes the following material terms

- LCL has granted TGC an option to acquire its Colombian projects.
- TGC to pay LCL A\$1 million in cash upon satisfaction of the Conditions Precedent.
- TGC must complete a transaction to go public on a recognised Canadian stock exchange by 31 December 2025 ("Going Public Transaction") and if TGC fails to complete, the Company will retain the cash consideration and the Colombian projects.
- The Going Public Transaction may be extended until December 2026 subject to certain expenditure commitments and cash payments made to the Company.
- The Company is to receive an additional A\$0.5 million in cash and a percentage of the share capital in the vehicle that completes the Going Public Transaction equivalent to A\$8.5 million in consideration shares upon the Going Public Transaction.
- TGC has the option to pay the Company A\$9 million in cash, in addition to the A\$1 million up front payment, to acquire 100% of the projects in lieu of a Going Public Transaction.

¹ Announcement 11 November 2024

² Announcement 13 December 2024

Completion is subject to the following Conditions Precedent:

- TGC to receive a legal opinion on the good standing and validity of the underlying mineral claims that comprise the Colombian projects.
- LCL to prepare and deliver to TGC, Audited Financial Statements of the Colombian companies holding the minerals tenements.
- Shareholder and any other applicable Regulatory Approvals, including LCL receiving shareholder approval under ASX Listing Rule 11.4.

The Company expects that all Conditions Precedent will be completed before 31 March 2025. It is anticipated that the approval of the Agreement at the General Meeting of shareholders will be the satisfaction of the final Condition Precedent under the Agreement.

About TGC: TGC is an exploration and mine development company focused on identifying and advancing world class projects in mining friendly jurisdictions. TGC has an exceptional team of mining professionals who have worked at and built some of the world's largest mining companies including Barrick, B2Gold, Yamana and Anglo Gold Ashanti. Led by President & CEO, Robert Vallis and backed by a team of industry veterans who have a proven track record of transformational mining developments, TGC is positioned to drive and advance the Quinchia and Andes projects forward and unlock value for all stakeholders.

No fieldwork on the Colombian tenements was undertaken during the Quarter.

Trenching Confirms Au-Cu Porphyry Discovery at Dada in PNG

Figure 1: Dada Trench and Soil geochemical results (labelled) with historical results (unlabelled) in the background.

The LCL field program was conducted over roughly 400m of strike in the north-south direction with six trenches completed (**Figure 1**). The Dada gold-copper porphyry prospect forms part of the Liamu Project in PNG (**Figure 2**). Historical surface sampling defined a 600m x 400m Au >0.1g/t anomaly, open to the west and coincidental with multiple NE-SW trending elongated Copper anomalies carrying over 500ppm Cu in soils and rock chips.

A previous trench (**the Footprint Trench**), excavated perpendicular to the NE-SW trend, exposed intense veining (up to 40 veins per metre consisting of 'A' and 'B' porphyry style veins) over **96m grading Au 0.41g/t** within felspar porphyry and diorite. This was not followed up until this recent exploration program.

In August 2024, LCL completed a trenching and pitting program to test for extensions to the intense porphyry veining and extensions of the gold rock chip anomaly to the west to determine the presence of a near surface causative gold-copper porphyry.

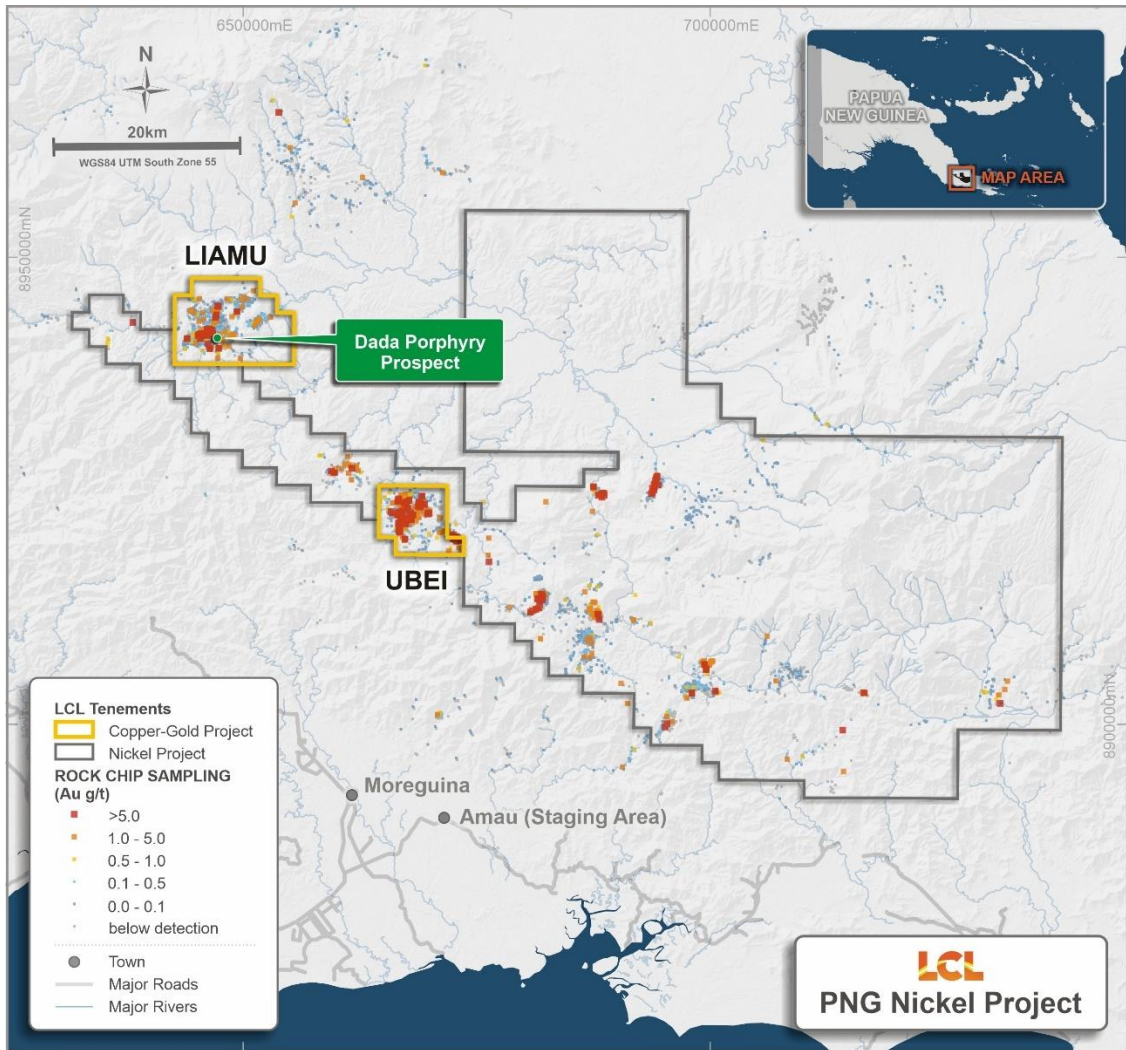

Figure 2: Regional image showing the Liamu and Ubei Cu-Au licences as well as the adjacent PNG Nickel project.

The trenching program targeted six trenches to test gold in soil anomalies along strike from the original Footprint trench at Dada. The trenching program was helicopter supported and carried out over a 3-week period in August. The trenches were hand dug and then channel sampled with samples being assayed for gold and multi-element geochemistry.

Summary Geology per trench:

Trench 1 is 17m long and encountered weakly magnetic, weathered diorite, displaying moderate phyllic alteration for its full length. Mineralisation is associated with A & B veins and tenor of mineralisation is correlated with the vein density. The trench returned **8m at 0.15g/t Au.**

Trench 2 is 44m long and located 230m north-east of the original Footprint Trench. The trench encountered Diorite, Hornblende porphyry and minor breccia with Phyllic alteration and structure controlled Argillic alteration. The trench returned **20m at 0.33g/t Au.**

Trench 3 is 25m long and located 100m east of the Footprint Trench. The trench encountered porphyritic diorite and minor breccia with phyllic alteration. The trench is cut by A & B veins with a density of 10-15 veins per metre and a stockwork zone with over 40 veins per metre. This trench returned the best results with **25m at 0.34g/t Au & 0.27% Cu**. Mineralisation remains open at both ends.

Trench 4 is 12m long and located 40m east of the Footprint trench. Geology included porphyritic diorite and feldspar-hornblende porphyry, both of which displayed phyllic alteration. The trench returned **12m at 0.21g/t Au & 0.12% Cu**.

Trench 5 is 33m long and located around 60m east of the Footprint trench. Geology included various feldspar-hornblende porphyry intrusives with phyllic alteration and porphyry A veins. The trench returned **33m at 0.31g/t Au & 0.12% Cu**.

Trench 6 is 8m long and located 400m to the north of the Footprint trench. The trench sought to explain an historical pit sample containing over 3g/t Au. The trench was hosted in diorite, did not encounter porphyry mineralisation and returned **8m at 0.11g/t Au**.

Full trench results are as follows:

Trench ID	Easting	Northing	Length	From (m)	To (m)	Intercept
Trench 1	647139	8941330	17m	8	16	8m at 0.15g/t Au
Trench 2	647169	8941434	44m	6	26	20m at 0.33g/t Au
Trench 3	647172	8941234	25m	0	25	25m at 0.34g/t Au & 0.27% Cu
Trench 4	647116	8941198	12m	0	12	12m at 0.21g/t Au & 0.12% Cu
Trench 5	647129	8941218	33m	0	33	33m at 0.31g/t Au & 0.12% Cu
Trench 6	647234	8941581	8m	0	8	8m at 0.11g/t Au

In addition to the trenches, 13 sample pits on a nominal 100m x 100m grid were excavated to the west of the Dada known mineralisation and 18 grab samples were also collected. The pits cover an area of around 300 x 500m and samples were collected between 0.5m and 3m deep depending on the depth to bedrock. Assays received from pit sampling have extended the mineralisation to the west and generally returned >100ppm Cu with two pits returning **0.31g/t Au** and **0.54g/t Au** respectively. Two grab samples to the south of the Dada porphyry returned **2.19g/t Au** and **1.29g/t Au** and hint at the possibility of a higher-grade zone within the porphyry system.

No fieldwork was undertaken during the Quarter on the Company's other PNG tenements.

Corporate and Appendix 5B disclosures

In November the Company raised A\$1.99 million (before costs) through the issue of 216,666,667 fully paid ordinary shares via a placement to professional and sophisticated investors. The Company also issued 5,227,274 shares to one former and one current Director in lieu of unpaid Director fees and 8,040,740 shares for the acquisition of exploration license EL2566 in PNG as announced on 26 June 2023.

In November long standing Director and Executive Chair Mr Ross Ashton resigned from the Board. Non-Executive Director Mr Christopher van Wijk assumed the role of Executive Chair upon the date of Mr Ashton's resignation. Mr Chris Knee, currently joint Company Secretary, was appointed Non-Executive Director.

In November, the Company issued Mr Chris Knee 11.9 million performance rights upon his appointment as Non-Executive Director.

In December 2.44 million Performance Right expired with vesting conditions not satisfied.

Cash held by the Company as at 31 December 2024 was A\$2.8 million.

As outlined in the attached Appendix 5B, during the quarter the Company spent approximately:

- A\$278K on exploration activities which was largely the exploration program at the Dada gold-copper porphyry Liamu Project PNG and other holding costs.
- Amounts included in item 6.1 of the Appendix 5B was A\$41k. Included in this amount is A\$14k for director salaries, consultancy fees and superannuation and A\$27k for payments to Greystone Corporate Pty Ltd for Company Secretary, accounting and bookkeeping services of which Director Mr Chris Knee is a shareholder and director.
- A\$122K on administration and corporate costs.

For the purpose of ASX Listing Rule 15.5, the Board has authorised the release of this announcement.

For further enquiries contact:

Chris van Wijk

Executive Chair

COMPLIANCE STATEMENT

With reference to previously reported Exploration Results and Mineral Resources, the Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

JORC STATEMENTS - COMPETENT PERSONS STATEMENTS

The technical information related to LCL's Colombian assets contained in this report that relates to Exploration Results (excluding those pertaining to Mineral Resources and Reserves) is based on information compiled by Mr Cesar Garcia, who is a Member of the Australasian Institute of Mining and Metallurgy and who is a Geologist employed by LCL on a full-time basis. Mr Garcia has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration, and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Garcia consents to the inclusion in the release of the matters based on the information he has compiled in the form and context in which it appears.

The information contained in this announcement that relates to Exploration Results in Papua New Guinea is based on information compiled by Mr Chris van Wijk, who is a Member of the Australasian Institute of Mining and Metallurgy and who is a Geologist and Executive Chairman of LCL Resources. Mr van Wijk has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration, and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr van Wijk consents to the inclusion in the release of the information he has compiled in the form and context in which it appears.

EL2391 Ada'u River	LCL Footprint South Ltd	Under Renewal (2)

- (1) Exploration Licences in PNG are granted for a two-year period with no limit on the number of renewals allowed.
- (2) The renewal process in PNG consists of the lodgement of a renewal application, nomination of a Warden's Hearing date, conduct of the Warden's Hearing, assessment of the information by the Mineral Advisory Council/MRA prior to referral to the Mining Minister for approval. As this process typically takes 6 to 12 months to complete, it is common for PNG Exploration Licences to be in Renewal status. The MRA requires Explorers to maintain exploration activities throughout the Renewal period.

- (1) All titles are part of the Quinchia Gold Project, Quinchia, Department of Risaralda, Colombia.
- (2) MCM (Miraflores Compañía Minera SAS) a 100%-owned subsidiary of North Hill Holdings Group Inc., owned as to 100% by LCL.
- (3) Concessions at Exploration Stage have 3-year life extendable for 2 years to a maximum 11 years.
- (4) Applications have neither legal liabilities nor certainty that they will be granted in whole or in part. If there was open ground at the time of lodging, a contract for exploration and potential exploration will be offered to the applicant. MCM has a beneficial interest of 100% of the tenement when the application is granted.
- (5) AGA (AngloGold Ashanti Colombia SAS). LCL has a 100% beneficial interest in these tenements which are in the process of transfer to MCM.
- (6) These licences have passed the 11-year maximum term. The Company has applied to integrate these titles with neighbouring concessions, a common process within concession terms that extend concessions beyond the 11-year maximum by using the status of neighbouring licences when the expired licence area is of importance but not sufficiently advanced to progress to exploitation status.

- (1) All titles are part of the Andes Gold Project, located in Antioquia, Risaralda and Choco, Departments of Colombia. Pursuant to the Interest Transfer Agreement with Bullet Holding Corporation (Bullet), Andes Resources Pty Ltd has a 90% beneficial interest, and Bullet has a 10% interest. All tenements have been crossed checked against the National Mining Authority Registry (ANNA) and reflect the status reported in ANNA. The Colombian Mining Authority's migration to a new tenement management and cadastre system (ANNA) has generated inconsistencies and issues concerning certain mineral tenement boundaries. In addition, there is uncertainty regarding the application and constitutionality of Presidential Decree 1955/19, the purpose of which was to re-instate certain land rights over free land to qualifying informal miners. The issues are not unique to LCL and have the potential to reduce the footprint of a subset of exploration licence applications within the Company's Andes Gold Project. The Company is monitoring the situation and will keep the market informed of developments.
- (2) The Titleholders of the tenements are:
 - (2.1) Tenements in process of acquisition by Andes Resources EP S.A.S (Andes Resources) where Andes Resources owns 77% of the underlying company, Ni Maria J SAS and is earning 100% which will then still be subject to the 10% Bullet holding discussed in (1) above.
 - (2.2) The titleholders of the applications are various companies associated with Bullet and covered under the Interest Transfer Agreement - see note (1).
 - (2.3) Andes Resources is a subsidiary company of LCL.
- (3) Concessions at Exploration Stage have 3-year life extendable for 2 years to a maximum of 11 years.
- (4) Concessions at Exploitation Stage have 30-year life extendable for 30 years. This concession has an area reserved for exploration.
- (5) 5-year life extendable for 5 years and the tenement is in process of transformation to Concession contract.
- (6) Applications have neither legal liabilities nor certainty that they will be granted in whole or in part. If the ground was open ground at the time of lodging, a contract for exploration and potential exploitation will be offered to the applicant. Andes Resources has a beneficial interest in the tenement when the application is granted.

Authorised by: **The Board**
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
